

## *Southern Mountain Reedbuck*

SCI Record Book of Trophy Animals and the  
SCI Trophy Records Committee proudly presents  
this certificate to:

**Mechislav Klimovich**

for taking a Southern Mountain Reedbuck  
with a Rifle measuring 13

On a hunt in R.S.A., N.W. Province on 07/04/2011  
Measured by Mechislav Klimovich on 03/26/2012.

Your entry currently ranks **Number 38**, a Silver Medal

**Redunca fulvorufula fulvorufula**

**DESCRIPTION** The southern mountain reedbuck is larger and somewhat redder in color than other mountain reedbuck, but is otherwise similar.

**DISTRIBUTION** Discontinuously in its specialized habitat in the eastern part of South Africa: the Transvaal except for the northeast and west; Natal; southern and eastern Orange Free State; and eastern Cape Province. There also are limited distributions in the Lobatsi area of southeastern Botswana and in the Lobombo Mountains of southwestern Mozambique.

In South Africa it is found as high as 8,000 feet (2,400 m) in the Drakensberg Mountains, on rocky hills in Zululand not far above sea level, and at all intermediate elevations.
