

CENTRAL EUROPEAN MOUFLON 1
AUSTRIA, Missenbach
JANUAR 2008
MECHISLAV KLIMOVICH

BRONZE AWARD
117 2/8

Mouflon (G), Mouflon (F).

DESCRIPTION (*male*) Shoulder height 26-30 inches (66-76 cm). Weight 70-100 pounds (32-45 kg). Females are a little smaller.

One of the world's smallest wild sheep, resembling a slim domestic sheep except that it has a normal coat of hair, any wool being concealed beneath it.

Upper parts are reddish-brown with a pale (almost white) saddle patch in the winter coat.

Underparts, rump, lower legs and muzzle are white. There is dark neck ruff but no bib. The horns usually grow in a tight circle, with the tips turned inward toward the face and broomed back to about a three-quarter curl. In a purebred European mouflon, the tip-to-tip spread should not be the widest spread. Females sometimes grow small horns, but usually are hornless.
