

CENTRAL EUROPEAN MOUFLON 2  
AUSTRIA, Missenbach  
JANUAR 2008  
MECHISLAV KLIMOVICH

BRONZE AWARD  
112 1/8

Mouflon (G), Mouflon (F).

**DESCRIPTION** (*male*) Shoulder height 26-30 inches (66-76 cm). Weight 70-100 pounds (32-45 kg). Females are a little smaller.

One of the world's smallest wild sheep, resembling a slim domestic sheep

except that it has a normal coat of hair, any wool being

concealed beneath it. Upper parts are reddish-brown

with a pale (almost white) saddle

patch in the winter coat. Underparts, rump, lower legs and muzzle are

white. There is dark neck ruff but no bib. The horns usually grow in a tight circle, with the tips turned inward toward the face and broomed back to about a three-quarter curl. In a purebred European mouflon, the tip-to-tip spread should not be the widest spread. Females sometimes grow small horns, but usually are hornless.
